

CONTENTS

Summary	1
1. Background	5
1.1 The role of health economics	5
1.2 Status of methodology	7
1.3 Health economic analyses.....	7
1.4 Study designs	7
1.5 Data sources	8
1.6 Guidelines for the performance of economic evaluations	9
1.7 Potential for automated databases.....	10
1.8 Pilot study rationale	11
2. Pilot Study objectives	13
3. Study methods.....	15
3.1 Structured interviews	15
Companies & Academia	15
Data providers.....	16
3.2 Evaluation of UK automated databases	17
Selection of databases for evaluation.....	17
Assessment criteria	18
4. Results	19
4.1 Structured interviews	19
Data requirements for health economics studies	19
Data sources	19
Experience of using automated databases.....	22
Issues raised	23
Views of data providers	23

4.2 Evaluation of UK automated databases	24
Relevant characteristics for health economics research.....	24
Representativeness	28
Data quality and validity	28
Data content	29
Ability to generate data for health economics	29
Development of assessment criteria.....	31
Testing of assessment criteria	31
5. Discussion	37
6. Recommendations.....	39
6.1 Companies.....	39
6.2 Data providers.....	40
7. Next steps.....	41
8. Acknowledgements.....	43
9. References.....	45
Appendices.....	47
I Definitions	47
II Interview checklist	51
III Standard formats of studies used to help evaluate utility of assessment criteria	57
IV References on UK automated databases.....	61
V. Results from an assessment of UK automated databases against specific study requirements	65
